

## TECHNICAL DATA SHEET – REZROK® 157

Revised: 2/2017

### DESCRIPTION

RezRok 157 is a multifunctional polymer grout formulated to provide maximum chemical resistance to 98% sulfuric acid and other aggressive chemicals. The grout combined blended filler and epoxy novolac resin with a special “stress-relieving” additive to provide a durable and concrete compatible grouting material.

### PERFORMANCE DATA

DENSITY	136 lbs/ft <sup>3</sup>
VISCOSITY	Flowable Grout
VOC	0.00 lb/gal; 0.00 gm/L
VOLUME SOLIDS	100%

### STORAGE & INSTALLATION

STORAGE ENVIRONMENT	Dry area, 65-80°F
APPLICATION TEMPERATURE, AMBIENT	50-95°F
APPLICATION TEMPERATURE, SUBSTRATE	Minimum 5°F above dew point
SHELF LIFE	1 year
INSTALLATION THICKNESS, MAXIMUM LIFT PER POUR	3"
POT LIFE, @ 77°F	35 minutes
INITIAL SET (REMOVE FORMS), @ 77°F	24 hours
FULL SERVICE, @ 77°F	2-3 days

*Material cures more slowly at cooler temperatures, and working time will be substantially reduced at higher temperatures. In hot weather, material should be cooled to 65°F to 80°F prior to mixing and application to improve workability and avoid shortened pot life. The data shown above reflects typical results based on laboratory testing under controlled conditions. Reasonable variations from the data shown above may result.*

### BENEFITS

- Withstands direct exposure to most inorganic acids (98% sulfuric acid, 100% phosphoric acid, 38% hydrochloric acid) and other aggressive caustics and solvents
- Superior compatibility with concrete substrates
- 100% solids, zero VOC formulation
- Pourable consistency

### RECOMMENDED USES

- Set pumps and tanks
- Resurface trenches
- Seal around equipment

### GENERIC DESCRIPTION:

Epoxy Novolac

### STANDARD COLORS:

Gray

### PACKAGING:

- 2-Cubic Foot (ft<sup>3</sup>) Unit, consisting of:
- Component A resin
  - Component B hardener
  - 4 bags F-1 powder

### COVERAGE:

2 Cubic Feet (ft<sup>3</sup>)

**REZROK® 157**  
**GROUT, CHEMICAL RESISTANT**

### CONSIDERATIONS & LIMITATIONS

1. This product is not recommended for nitric acid exposure.
2. Some staining may occur when in direct contact with sulfuric acid or other chemicals.
3. Always protect the work area from direct sunlight or inclement weather before, during and directly after grouting.
4. Keep all components away from heat or open flame.
5. Grouting and mixing area must be well ventilated.
6. Do not thin with solvents unless advised to do so by ITW Engineered Polymers.
7. Confirm product performance in specific chemical environment prior to use.
8. Prepare substrate according to “Surface Preparation” portion of this document.
9. Always use protective clothing, gloves and goggles consistent with OSHA regulations during use. Avoid eye and skin contact. Do not ingest or inhale. Refer to Material Safety Data Sheet for detailed safety precautions.
10. For industrial/commercial use. Installation by trained personnel only.

### SURFACE PREPARATION

**CONCRETE:** Apply only to clean, dry and sound concrete substrates that are free of all coatings, sealers, curing compounds, oils, greases or any other contaminants.

- New concrete should be cured a minimum of 28 days.
- Concrete that has been contaminated with chemicals or other foreign matter must be neutralized or removed.
- Remove any laitance or weak surface layers.
- Concrete should have a minimum surface tensile strength of at least 300 PSI per ASTM D-4541.
- Surface profile shall be CSP-3 to CSP-5 meeting ICRI (International Concrete Repair Institute) standard guideline #03732 for coating concrete, producing a profile equal to 60-grit sandpaper or coarser. Prepare surface by mechanical means to achieve this desired profile.
- Moisture vapor transmission should be 3 pounds or less per 1,000 square feet over a 24 hour time period, as confirmed through a calcium chloride test, as per ASTM E-1907. Quantitative relative humidity (RH) testing, ASTM F-2170, should confirm concrete RH results <75%.
- All surface irregularities, cracks, expansion joints and control joints should be properly addressed prior to application.

**STEEL:** For steel surfaces, a “Near White Metal” ultra high-pressure wash or abrasive blast with anchor profile of 2–4 mils in accordance with Steel Structures Painting Council Specification SP-10 or NACE No. 2 is required.

**Refer to PolySpec Guidelines for Subfloor Preparation for additional details.**

### INSTALLATION STEPS

**NOTE:** Refer to “Considerations & Limitations” and “Surface Preparation” portions of this document for important instructions.

1. **PREPARATION:** Remove oils from machinery using a degreaser. Metal surfaces to receive grout should be roughened with a grinder prior to grouting.
2. Build forms up at least one inch above the bottom of the equipment frame. Apply paste wax to forms and chamfer strips in two coats. Seal forms with caulking material. Forms should be watertight.  
**NOTE:** In some cases, it may be necessary to add steel reinforcement to the grout bed, especially in corner areas. For larger pours, expansion joints are recommended. For more information, consult your ITW Engineered Polymers Technical Representative.
3. **MIXING:** Pour Component A Resin into Component B Hardener pail. Mix thoroughly for at least two minutes using a mechanical jiffy-type mixer operated at low speed. Do not over mix.  
**NOTE:** Do not add water or solvents to any of the components. Do not alter liquid proportions.
4. Pour catalyzed liquid into a concrete mortar mixer.
5. Add Part C Aggregate gradually while mixing at 20 rpm maximum. Mix until all particles are wetted out. Use all of the aggregate unless advised otherwise by a ITW Engineered Polymers Technical Representative.
6. **APPLICATION:** Pour catalyzed grout into forms from one end to the other in the area to be grouted.  
**NOTE:** Depth of pour in one application should not exceed 3 inches. If a total depth of more than 3 inches is required, consult your ITW Engineered Polymers Technical Representative.
7. Final grout level should come slightly above base plates or machinery frame.
8. Smooth grout surface by lightly brushing with a brush dipped in PolySpec® Smoothing Liquid #2. Do not overuse.
9. **FINAL PROCEDURES:** Always wear gloves when using this product.
10. Forms may be removed after grout has completely cooled.
11. Make sure grout area is protected from sudden temperature changes for at least 48 hours after grouting.

ITW Engineered Polymers warrants its products to be free from defects in material and workmanship. ITW's sole obligation and Buyer's exclusive remedy in connection with the products shall be limited, at ITW's option, to either replacement of products not conforming to this warranty or credit to Buyer's account in the invoiced amount of the nonconforming products. Any claim under this Warranty must be made by Buyer to ITW in writing within five days of Buyer's discovery of the claimed defect, but in no event later than the expiration of the applicable shelf life, or one year from the delivery date, whichever is earlier. Buyer's failure to notify ITW of such nonconformance as required herein shall bar Buyer from recovery under this warranty.

**ITW makes no other warranties concerning this product. No other warranties, either expressed or implied, or statutory, such as warranties of merchantability or fitness for a particular purpose, shall apply. In no event shall ITW Engineered Polymers be liable for consequential or incidental damages.**

Any recommendation or suggestion relating to the use of the products made by ITW, whether in its technical literature, or in response to specific inquiry, or otherwise, is based on data believed to be reliable; however, the products and information are intended for use by Buyers having requisite skill and know-how in the industry, and therefore it is for the Buyer to satisfy itself of the suitability of the products for its own particular use, and it shall be deemed that Buyer has done so, at its sole discretion and risk. Variation in environment changes in procedures of use, or extrapolation of data may cause unsatisfactory results. ITW cannot guarantee that color will conform to sample, if provided.
